DETAILED ACTION

1. Claim 39 has been newly added. The species represented by the formula IIa in Claim 39 is allowable over the prior art. The formula "II" in the claim should be --IIi--. The elected species (filed 7/7/05) is allowable. Because the elected species is allowable therefore the Examiner picks the species represented by IIe and IIk for further prosecution.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-7, 10-11, 24-26, 29-30 and 33-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Ong et al. (US 20030160230 or US 6,770,904 or CAPLUS 2003:568634 or CAPLUS 2003:568633).

The reference discloses polythiophene represented by formula (I), which are useful as active semiconductor for electronic devices such as thin film field-effect transistors (FETs) or thin film transistors (TFTs). See the formulae (I)-(IV) in the references of US '230 and '904 and RN 827343 of both CAPLUS references. The references clearly anticipate the claimed invention.
